SSM
## Sphere Service Manager

Intuitive workflow editor

Media distribution has become a major issue for broadcasters. In-house distribution to partners, to Replay and VOD platforms: MBT has designed a unique dedicated solution to create and manage automatic or semi-automatic distribution workflows from the simplest to the most complex with ease.

Sphere Service Manager (SSM) is a powerful workflow engine entirely dedicated to automation of audio/video processing and media distribution. With its innovative web client and intuitive workflows editor, it offers unmatched flexibility and efficiency.

Web client

Thanks to our web client, you can access the SSM from anywhere at any time. Whether you're in the office, on the go or working from home, you can stay connected and manage your workflows effortlessly. Detailed supervision and administration, manual job creation, status of different drivers, statistics: everything is directly accessible.

Intuitive workflows editor

Sphere Service Manager's intuitive workflows editor puts you in charge. Our drag and drop interface allows you to easily create and modify your workflows, adapting them to your specific needs. Whether it's a simple approval process, a complex, multi-step workflow, or a combination of both, our solution will meet all your demands. Customize your notifications, set escalation rules and automate repetitive tasks effortlessly, freeing up valuable time.

Key Features :

- Create customed workflows in a few clicks
- Monitoring workflows via the web client
- Compatibility with many third party systems
- Intelligent resource management optimization
- Dedicated database
- Base de données dédiée
